

# SpongeBob Safety Scenarios – Station 1

For each scenario, write down what lab rule(s) was broken on your answer sheet.

1. SpongeBob poured some of a liquid into a test tube and began to heat it. When it started to bubble, he looked into the test tube to see what was happening and pointed it towards Gary so he could see.

**\*SpongeBob should not have pointed the test tube towards anyone to see it. He should also be wearing safety goggles.**

2. Gary didn't think the substance in the test tube smelled poisonous and tasted a little bit of the substance.

**\*Never smell or taste a liquid or substance without the approval of the teacher.**

3. SpongeBob and Gary were worried about running out of time, so they left the test tube and materials on the table and moved to a different station to try another experiment.

**\*Always clean up your lab area, including lab equipment and working space.**

4. Patrick didn't want to waste any time reading the directions, so he put on some safety goggles and picked a couple different substances.

**\*Always read the directions before you begin ANY experiment or lab procedure.**

5. SpongeBob noticed that he had a small cut on his finger but decided he didn't have time to tell the teacher about it.

**\*Always let the teacher know if you are injured or bleeding.**
